## Rules and Regulations Governing Service Furnished to Subscribers

---

The following are the Rules and Regulations governing Subscribers' telephone service furnished by the IOWA TELEPHONE COMPANY within its Ames Exchange:

All telephone equipment furnished to subscribers shall be used only by the Subscriber or members of his family, his guests or persons residing with him, or by his agents or employees when engaged in his business; shall not be used in any manner in competition with the business conducted by the Company; shall not be removed from the Subscriber's premises except by an agent of the Company; shall not be connected with any equipment or appliance not furnished by the Company; and shall be surrendered to the Company upon termination of the Subscriber's right of use.

At all reasonable times the Company, through its authorized employees shall have the right of access to the premises of the Subscriber to install, inspect, or repair the lines or equipment, or to remove them upon termination of Subscriber's right of use.

The Company does not guarantee uninterrupted working of its lines or equipment. For any complete failure of service of more than twenty-four hours' duration, of which the Company is promptly notified in writing, a pro rata abatement of the contract charge will be made.

The Company reserves the right to change the Subscriber's telephone number or designation at any time.

The Subscriber will be required to pay the Company's customary charges for any change in the location of his telephone equipment, made at his request.

The Subscriber agrees to pay the Company at its established rates for all supplemental service or equipment which the Company may furnish upon his written or verbal order.

The Company may at any time demand payment on account in advance of the establishment of service.

All bills are due when rendered, and are payable at the Company's office. Failure to receive bill, however, does not exempt the Subscriber from prompt payment as required by contract. In the event of any default of payment or other breach of the terms of its service contract, the Company may discontinue the Subscriber's service, or disconnect or remove his telephone equipment.

"The Company assumes no liability for damages accruing from errors or omissions in making up or printing this directory. Every effort is made to avoid errors, but mistakes will occur, and the liability of the Company for such mistakes is governed by rules and regulations of the Company."

## GENERAL INFORMATION

---

**CALL THE REPAIR DEPARTMENT** if your telephone is out of order.

**CALL THE CHIEF OPERATOR** if you wish to complain about a local call just completed or in the process of completion; if a Long Distance call ask for the "TOLL CHIEF OPERATOR."

**CALL THE MANAGER'S OFFICE** if you wish to complain about a call not of recent occurrence or about unsatisfactory service of any kind.

**CALL CENTRAL** by removing the telephone receiver from the hook.

**WHEN THE OPERATOR ANSWERS** your signal by saying "Number," give her the desired Telephone number, slowly and distinctly, one figure at a time, as: "four, five two," (452) and see that she repeats it correctly.

**HANG UP THE TELEPHONE** when through talking. This signals the operator, automatically, that you are through, and until then she will not disconnect your line.

**TO CALL IN THE OPERATOR** for a second connection, or to correct a mistake, move the hook slowly up and down a few times. This flashes a small electric lamp signal in front of the operator, but if done too quickly may not be noticed by the operator.

Calls given by name instead of by Telephone number must be referred to a special information operator, as your regular operator is not provided with any printed list of subscribers and is not allowed to delay answering other calls while looking up numbers of subscribers called by name. Subscribers will no doubt recognize the importance of this rule in promoting good service, and their co-operation in enforcing it will be greatly appreciated.

**TO MAKE A "LONG DISTANCE" OR "TOLL CALL,"** ask the operator for "Long Distance" and give the Long Distance operator your own Telephone number and the name and telephone address of the person you wish to be connected with.

Rural subscriber's numbers are shown in four figure numbers, the first two figures indicating the line, and the second two the code ring, as, Number 2906, means line number 29, and code ring 6, which is one long and two short rings.

Number 5917 is line 59, and code ring No. 17, which is two short and one long ring.

# TOLL RATES

---

## NOTICE TO TOLL PATRONS

No charge will be made for toll line service when a particular person is called for and cannot be found, except the messenger service, if any, to look up the party. If, however, a firm or telephone number is called for, without specifying any particular person wanted, and the connection is once established, the regular tariff rate will be charged.

Subscribers desiring toll line service will be held responsible for all toll line connections originating from their telephones. No refund will be allowed unless claimed within twenty-four hours after an unsatisfactory service. Bills for toll service will be rendered monthly. When payment is refused, the subscriber's line will be barred against further use of Toll Lines until payment is made at this office.

Frequent applications are made to this Company's employes for the transmission and delivery of oral or written messages for toll line patron; but, while the Company desires to afford every reasonable accommodation to the public, the use of its lines is authorized only for and by patrons personally present at the telephones.

The Company does not undertake to transmit or deliver oral or written messages, and will assume no responsibility for such service. Any person or employe who assists patrons in communications does so, in each case, solely as the individual representative of the patron.

The Company's advertised rates for toll service cover in each case but one connection, and use or retention of the line not to exceed the minimum time shown on the Company's standard schedule as representing one communication. For all further or additional use or retention of the line in excess of the first period an additional charge will be made for consecutive periods as shown on effective schedules.

---

**ADVERTISING** in this Directory reaches many desirable people many times every day in the year. See manager for rates and spaces.

---

**NOTIFY THE REPAIR DEPARTMENT**

---

if your telephone is out of order. Call the manager's office  
if you fail to receive prompt attention, or wish to  
make an inquiry or complaint.

## Get the Right Number From the Telephone Directory

Whenever a wrong number is given to the telephone operator, your time is wasted, your service is delayed and its value decreased, and the party called is uselessly annoyed.

The largest number of errors result from dependence upon memory. Frequently numbers are transposed and 4-5-6 is called, for example, when 5-4-6 is wanted.

If you are in doubt about a telephone number, please look it up in the directory.

## How The Bell Telephone System Spends the Money Received From the Public

The following figures are taken from the annual report of the American Telephone and Telegraph Company and Associated Companies, or so-called Bell Telephone System.

Of each dollar received for the sale of service by the Bell System, 46½ cents are paid in wages to employees, and 33½ cents are spent for repairs and up-keep of the equipment, for taxes, incidental expenses and employees' welfare work, and 20 cents are paid to holders of Bell Telephone securities.

This 20 cents paid in interest and dividends is less than 6 per cent return on the money, since \$4 are invested in property for each \$1 in gross revenue received each year.

In order to get additional money for extensions and improvements in our equipment it is essential that the public, who are our stockholders, have faith in our securities and confidence that they will receive a fair return on their investment.

In spite of the increased cost of equipment and operation during the past three years few telephone rates have been increased; although there are few business enterprises in which the profit has been as small as in the telephone industry.

*Iowa Telephone Company*

## Living Costs are Higher Telephone Service is Cheaper

While the cost of most of the necessities of life has been going up, the price of telephone service has stood still, generally, or has been lowered. In a few cases only has it been increased.

The people of this country pay a great deal more today for food, fuel and clothing than they did a few years ago.

Although the buyer of meat, sugar, flour, potatoes, or butter still receives but sixteen ounces in a pound, although paying more money than before, the telephone user has been steadily getting more and better service and paying the same or less money than in the past.

Constantly the efficiency and value of telephone service to the subscriber has been increased. Today you can talk to an average of nearly twice as many persons in each exchange as you could five years ago.

In the telephone business we are paying, on an average, double the price for material and supplies we did three years ago.

In spite of increased labor and equipment costs the last few years, due to careful management, improved methods of operating, and a limited amount of new construction, there has been no general increase in telephone rates.

*Iowa Telephone Company*

## Don't ask "Central, Where's the Fire?"

When the fire alarm is sounded hundreds of well-meaning but thoughtless people hurry to the telephone and ask the operators, "Where's the fire?"

They do not realize what effect this has on telephone service, which is expected to be above the ordinary standard of efficiency at the time of an emergency.

But instead, hundreds of requests coming into the central office at once cause a delay of several minutes in replying to calls. The operators are unable to answer with normal speed.

Imagine the operators who attempt to serve the public at the time of a fire. How would you answer several hundred calls, if you were an operator, and which one would you answer first?

This company seeks to provide the best telephone service it is possible to give, but when hundreds of calls are made at once please do not blame the operators for not doing what is beyond the limit of human ability.

You will help those who may need rapid telephone service in moments of emergency when the alarm is sounded if you do not ask, "Central, Where's the Fire?"
